19 VR FOR PAIN MANAGEMENT

Virtual Reality has been used to manage pain and distress associated with a variety of medical procedures. In clinical settings and experimental studies, participants immersed in VR experienced reduced levels of pain and increased satisfaction.

RELATED CARDS:

- (29) XR & Medicine
- (59) VR Meditation
- (14) XR for phantom limb pain

Make a card:

1. Cut along the red lines
2. Glue the backs together

For best results, use a heavy cardstock for printing
