TOPICAL

**UNC AR VR****85****AR
SURGERY**

Augmented reality allows physicians to superimpose virtual images such as MRI or CT scans onto patients or in the physical environment, to assist them as a guide during surgery. VR also plays a key role in surgical planning and simulation.

RELATED CARDS:

- (29) XR & Medicine
- (16) Augmented Reality
- (64) VR Visualization

Make a card:

1. Cut along the red lines
2. Glue the backs together

For best results, use a heavy cardstock for printing
